Attachment to Independent Case Review Report For CDRU # 163 Case file # 95-268468.

Material Examiner:

Malone (RO)

Remarks:

After research it has been determined that the original or copy of incoming letter Laboratory number 50819001, dated August 5, 1985 (with original Laboratory number sticker) for Examiner Malone (RO) is missing from the case file at the time of review by the Independent Scientist.

Case resulted in trial. No transcript is available because it was destroyed or the testimony was never transcribed.

Comments (Set forth hy above question #, if applicable. Use "Additional Comments" Sheet, if needed) File #: 95-268468 #1: With microscopic hair comparison, even with the best notes, there is no way to determine the comparison was performed correctly. #2: The examination results set forth in two of the laboratory reports are supported by the bench notes, but the documentation is marginally adequate. The notes are not dated or initialed and are in pencil. The technician's notes do not indicate that any hair was recovered from any Q item. The laboratory report for 50814050 states "one dark brown head bair fragment of Negroid origin was found on specimen Q1"which matched the suspect's head hair sample. The bench notes do not indicate that the hair from Q1 was a fragment. 03/13/2001 8:30 AM (Date) (Time).
